

Here we define a block which will be inserted to another place.

$\langle \textit{Displayed label} \rangle \equiv$
1 **second line**
2 $\langle \rangle$

A block can be defined by parts.

$\langle \rangle + \equiv$
3 **fourth line**

And here we insert the block.

4 **first line**
5 $\langle \rangle$

Finally we define the inner block.

$\langle \textit{Inner block} \rangle \equiv$
6 **third line**
